

Student orientation

Studying ECE @ VNU-UET

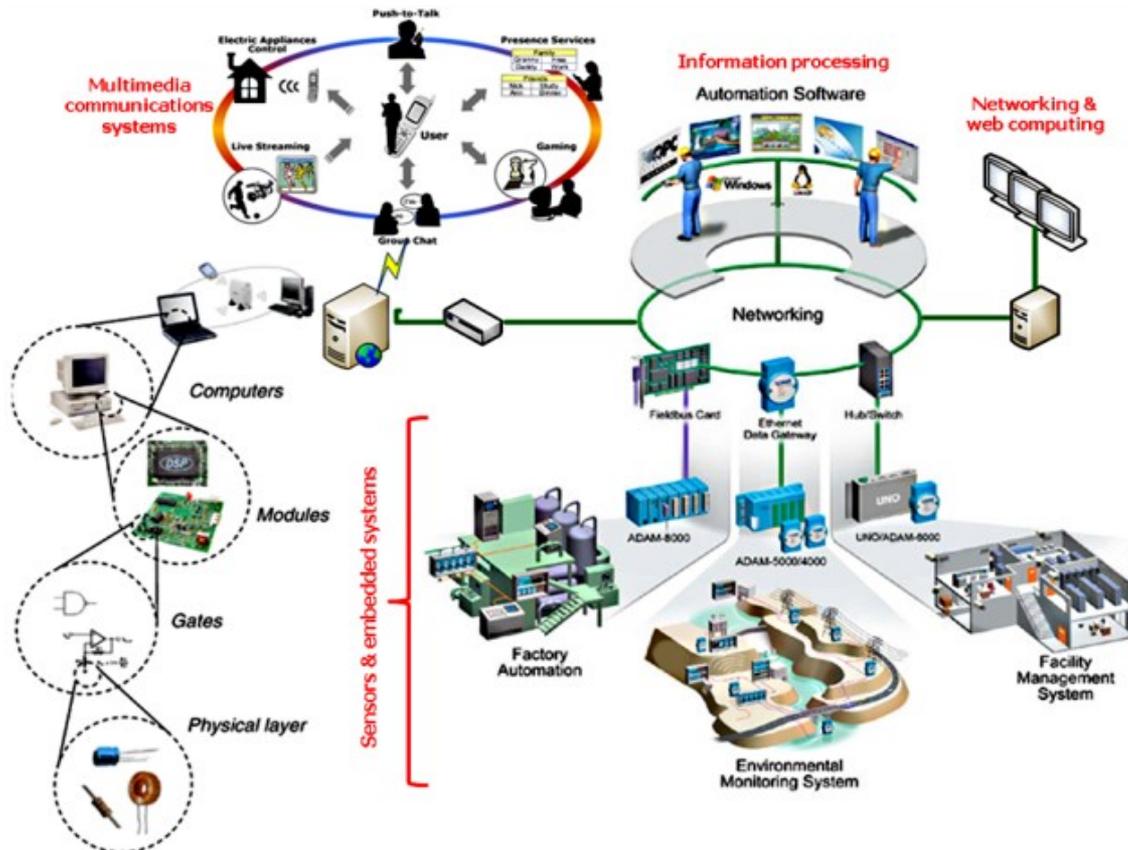

Hoang Gia Hung

Faculty of Electronics and Telecommunications

University of Engineering and Technology, VNU Hanoi

The program mission

- ❑ Provide students with high-quality education that produces young Professionals with strong academic and technical backgrounds.
 - Fusion of **computer science** and **electrical engineering**

ECE career outlook

US job market statistics

COMPUTER ENGINEERING AT A GLANCE

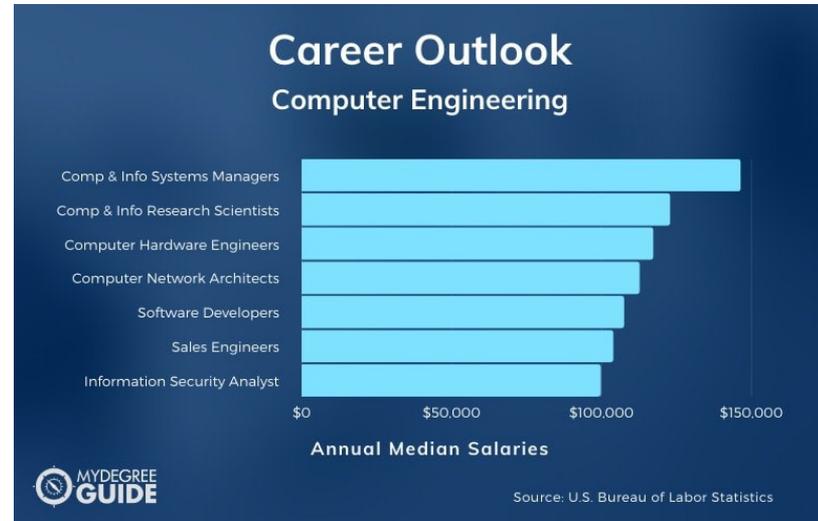

Computer engineers design innovative hardware and software for various computer systems, making this one of the most dynamic professions in the engineering field.

CORE GOAL
Design Innovative & Efficient Computing Components

DUTIES
Research, Design, Develop & Test Computer Hardware & Software

COMPUTER ENGINEERING INDUSTRIES
Telecommunications, High-Tech Manufacturing, Automotive, Health Care & Others

Sources: Houston Chronicle, Institute of Electrical and Electronics Engineers

Potential local employers

Program design

❑ **Pre-core subjects**

- Mathematical foundations (linear algebra, calculus, statistics)
- Introduction to ECE (electrical & computer)

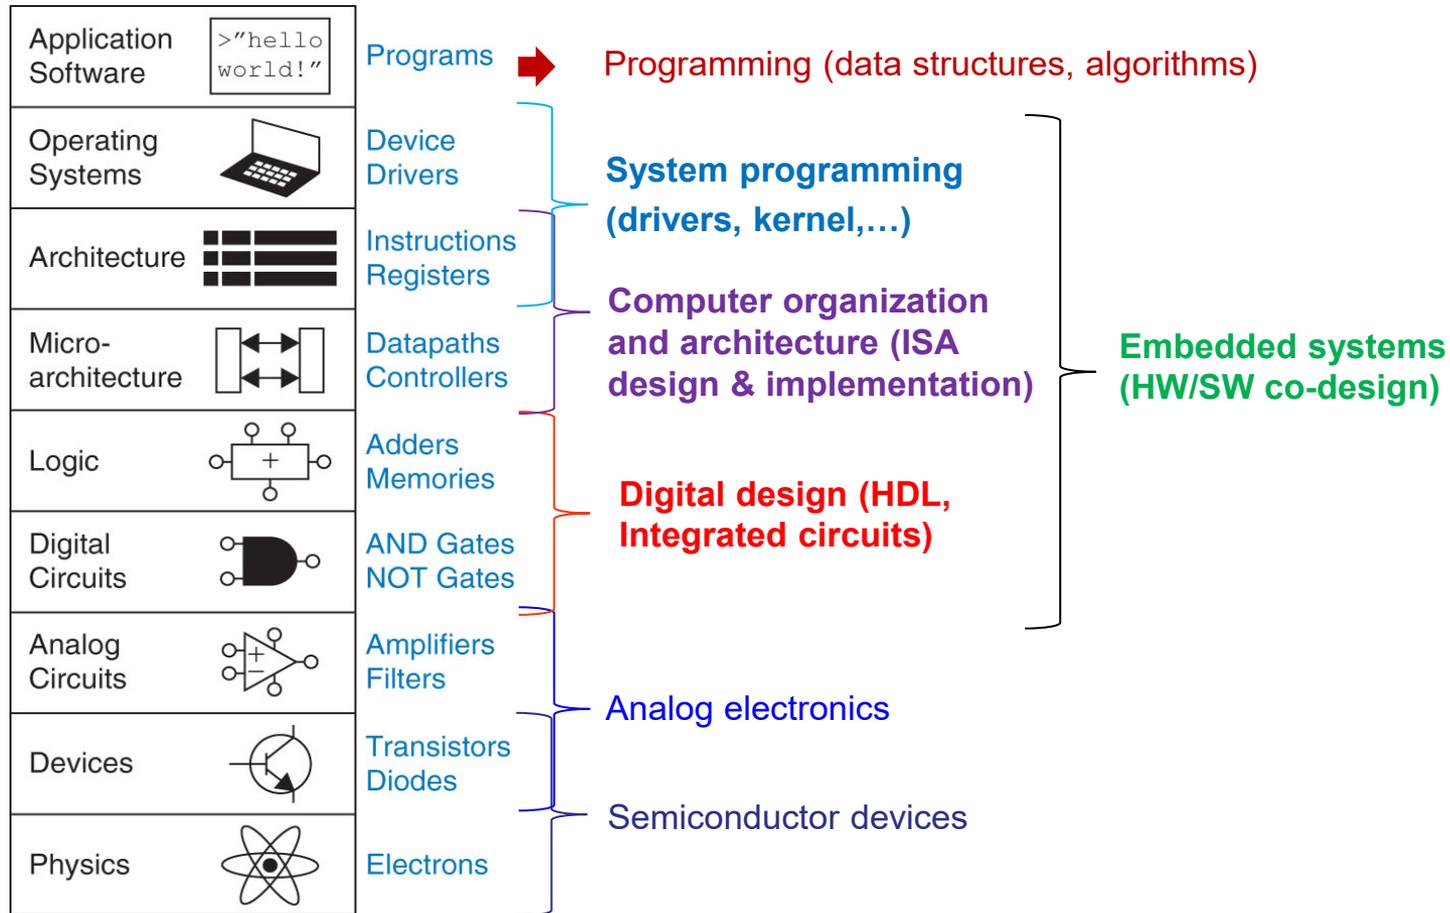

❑ **Core subjects**

- **Fundamentals of electrical engineering:** electronic devices & circuits (analog), digital logic
- **Fundamentals of computer science:** Data structures & algorithms, introduction to programming & software engineering
- **Signal transmission & processing:** signals & systems, digital signal processing, digital communications, controlled systems, computer networks

❑ **Depth and breadth**

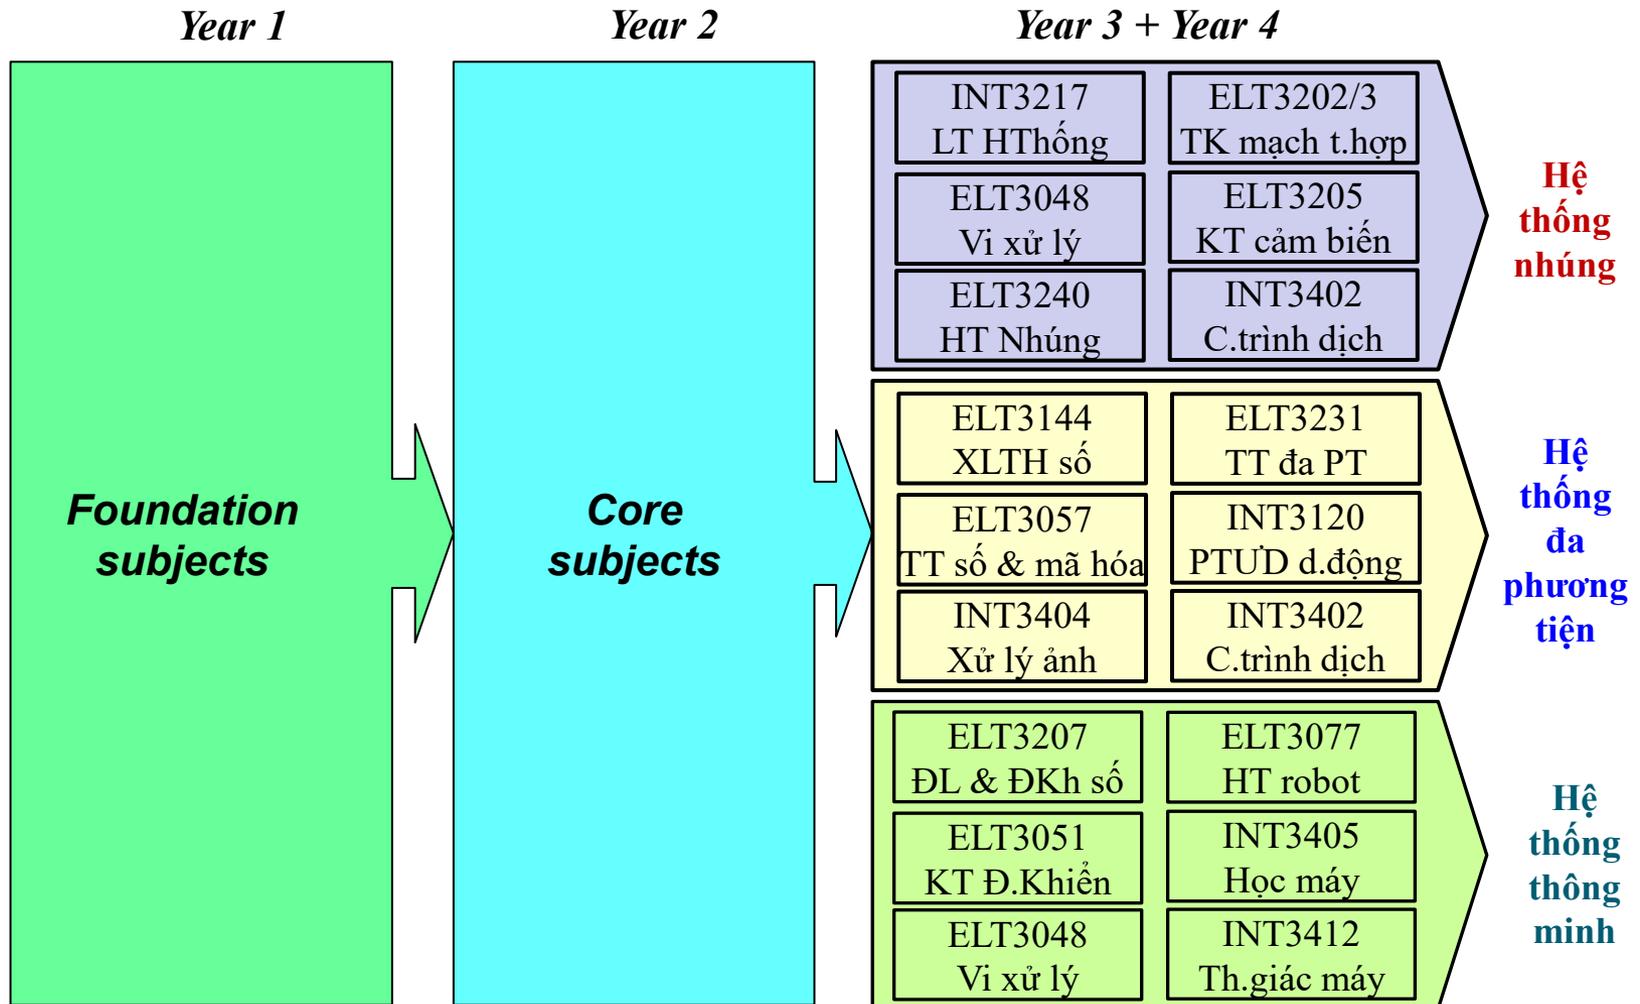

- **Computer systems:** VLSI design, computer architecture, microprocessors
- **System programming:** Principles of compiler & operating system
- **HW-SW co-design:** embedded systems/system on chips
- **Application-oriented electives:** automotive, multimedia, robotics, IoT, ...

Core skillset

Application fields: Multi-media processing, Digital control, Robotics, ...

Specialization: typical examples

People @ ECE

- ❑ Office: R. 702, E3 Building, 144 Xuân Thủy
 - <http://fet.uet.vnu.edu.vn/bo-mon-dien-tu-va-ky-thuat-may-tinh/>
- ❑ People

Prof. Bạch Gia Dương

Dr. Hoàng Gia Hưng

Dr. Nguyễn Kim Hùng

Dr. Phạm Đức Quang

Dr. Phạm Duy Hưng

MSc. Phạm Đình Tuân

Research directions

- ❑ Swarm robot (Dr. Phạm Duy Hưng)

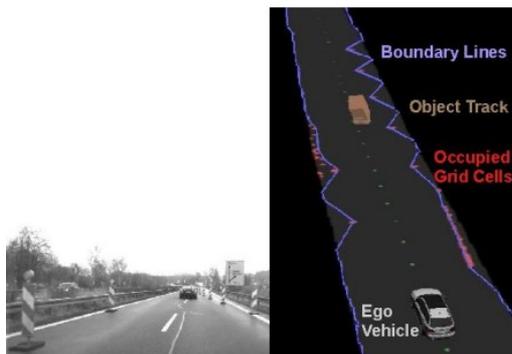

Đa robot phối hợp bao phủ, giám sát môi trường có cấu trúc

- ❑ Chip design & IoT applications (Dr Nguyễn Kim Hùng)

- ❑ Interdisciplinary research (Dr. Hoàng Gia Hưng, Dr. Phạm Đức Quang, ...)

- ❑ RF electronics (Prof. Bạch Gia Dương)

International collaboration

□ Australia
